DETAILED ACTION

Priority

1. The specification includes a statement that the application is a continuation-in-part of U.S. provisional application 60/395,106. However, a continuation-in-part can only claim priority to a *non-provisional* application.

A continuation-in-part is an application filed during the lifetime of an earlier nonprovisional application, repeating some substantial portion or all of the earlier nonprovisional application and adding matter not disclosed in the said earlier nonprovisional application. (In re Klein, 1930 C.D. 2, 393 O.G. 519 (Comm'r Pat. 1930)). The continuation-in-part application may only be filed under 37 CFR 1.53(b). The continuation-in-part application must claim the benefit of the prior nonprovisional application under 35 U.S.C. 120 or 365(c). See MPEP 201.08.

Applicant should remove the statement from the specification.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 37 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 37 it is unclear as to what element is encompassed by the "means for detachably mounting the guide to said tow vehicle". Claim 36 recites a body adapted to mount the position

Art Unit: 3611

indicating means to the trailer. This would appear to be the only disclosed means for mounting the guide.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Note that the “whereby” clause in claim 37 merely recites intended use. A claim containing a “recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus” if the prior art apparatus teaches all the structural limitations of the claim. *Ex parte Masham*, 2 USPQ2d 1647 (Bd. Pat. App. & Inter. 1987).

6. Claims 36-37 (as understood) are rejected under 35 U.S.C. 102(b) as being anticipated by Miller, Sr.

Miller, Sr. discloses a guide for aligning a tow vehicle with a trailer, said guide comprising:

position indicating means 50 including a first end, a second end, and an alignment mark 54 near said second end;

and a body 51 adapted to mount said position indicating means to said trailer.

Allowable Subject Matter

7. Claims 1-35 are allowed.

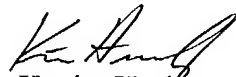

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references disclose trailer alignment markers.
